

Dear Customer:

Enclosed are Material Safety Data Sheets (MSDS) for the steel products you have purchased, or may purchase, in the near future from Marwas Steel Company. The Material Safety Data Sheets are provided as part of our continuing efforts to comply with the Occupational Safety and Health Administration Hazard Communication Standard, 29 CFR 1910.1200. These MSDSs are complete and accurate to the best of our knowledge.

While steel products in their usual physical state are not considered hazardous, when subjected to welding, burning, grinding, cutting, abrasive blasting, heat treating, pickling, or similar operations, they may emit potentially hazardous fumes or dusts.

Non-metallic coatings, such as drawing compounds and water soluble oils may be applied in small quantities to the surface of steel products during the manufacturing process. The possible presence of these coatings should be recognized and considered when evaluating potential employee health hazards and exposures.

If you have any questions concerning the Material Safety Data Sheet program, please contact the Safety Department at the phone number listed on the MSDS.

Respectfully submitted,

*Judy DeWitt*
